DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-49, drawn to compounds and compositions, classified in class 552, subclass 500+.
 - II. Claim 50, drawn to a method of producing antiprogestational effect, classified in class 514, subclass 169+.
 - III. Claim 51, drawn to a method of inducing menses, classified in class 514, subclass 169+.
 - IV. Claim 52, drawn to a method of treating endometriosis, classified in class 514, subclass 169+.
 - V. Claim 53, drawn to a method of treating dysmenorrhea, classified in class 514, subclass 169+.
 - VI. Claim 54, drawn to a method of treating endocrine hormone-dependent tumors, classified in class 514, subclass 169+.
 - VII. Claim 55, drawn to a method of treating meningiomas, classified in class 514, subclass 169+.
 - VIII. Claim 56, drawn to a method of treating uterine fibroids, classified in class 514, subclass 169+.

Art Unit: 1616

- IX. Claim 57, drawn to a method of inhibiting uterine endometrial proliferation, classified in class 514, subclass 169+.
- X. Claim 58, drawn to a method of inducing labor, classified in class 514, subclass 169+.
- XI. Claim 59, drawn to a method of contraception, classified in class 514, subclass 169+.
- XII. Claim 60, drawn to a method of postcoital contraception, classified in class 514, subclass 169+.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II-XII are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product (see Inventions II-XII).

3. Inventions II-XII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of

Art Unit: 1616

operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions they are not disclosed as capable of use together and they have different effects.

4. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for the other Groups, restriction for examination purposes as indicated is proper.

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from under the elected Group, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Ms. Eugenia Garrett-Warkowski on August 25, 2000 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1616

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
